

AB-Inforcer® Testimonials

CORE BIOFEEDBACK TRAINER

The secret to a stronger core rests in the palm of your hand.

AB-Inforcer® Hand piece:

“Smart Logic” built into the hand piece provides immediate visual, audible, and sensory feedback in exercise mode.

- Innovative design incorporates 3 torso devices in one: bi-lateral core trainer, postural trainer, relaxing massager.
- The only core strengthening device that systematically bridges the gap between learning about the neutral spine concept in a non-weight bearing setting and then allows the user to apply that concept to weight bearing functional movement.
- Multi-patented 3-sensor system transmits pleasant audible and vibrating sensory signals to the user which encourages better training form and increased postural awareness to maximize training results and improve posture.
- Interactive biofeedback technology built into the supportive contoured neck and lumbar cushions increases abdominal and core muscle activation.
- Endorsed by Medical Doctors, Physical Therapists, Chiropractors, Coaches, Strength Coaches, Athletic Trainers, Professional Athletes, and Personal Trainers
- Ergonomic neck and lumbar cushions support the spine and reduce the risk of neck strain while exercising or performing core strengthening exercises
- Scientifically designed dual low back sensors enhance bi-lateral muscular strength-endurance, coordination, control and contraction awareness to the lumbo-sacral region.
- Versatile and portable design allows the AB-Inforcer® to be used on any stable surface including the floor, Physical Therapy table, Shuttle®, Total Gym®, or horizontal wall and attaches firmly to most standard flat or incline benches.
- Easy transition to the stretch/relax massage mode.
